STOCK PICKER MODELS

K-Tec ProFlow™ Series stock picker carts deliver flexibility, top quality and low maintenance. Standard features include:

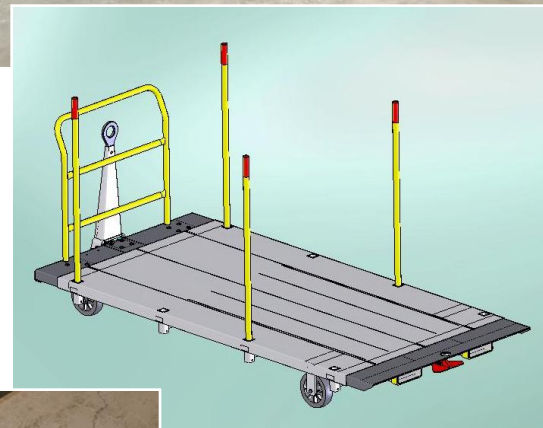

- Formed and Welded Steel Multi-Panel Frame
- 1,100 lb. Rated Deck Loads
- Light Tare Weights, Ultra-Quiet Operation
- Choice of 2 standard Deck Sizes
- Low Push/Pull Force 4 Wheel Systems
- Boxed Extended Reinforced Fork Pockets
- Choice of Latch Type or Grab Block Safety Lock
- HD Floor Look
- Choice of Coupling Systems

Model Shown: KT1-96SP Stock Picker

INDUSTRY LEADING DESIGN

Carts meet standard ergonomic limits for manual push/pull forces with heavy payloads and standup to tough loading conditions. FEA (finite element analysis) puts stiffness and weight where needed to produce carts as light and rugged as possible. "Attention to detail" features help meet rigorous K-Tec safety, reliability and durability standards. K-Tec ProFlow™ carts carry a two (2) year limited warranty.

Model: KT1-72SP Stock Picker

LEAN and GREEN

Our carts extend the safe limits of human power to move loads manually. Tugging trains of heavy boxes and pallets consumes less energy than moving by conventional methods. This translates into reduced handling costs and lower overall emissions along the way. Low maintenance designs provide for low total life cycle costs. K-Tec's standard ProFlow™ Series of carts with ergo-support products such as lifts and conveyors provide higher capacity and an integrated material flow solution. A "try before you buy" **demo program** for qualified customers delivers a hands on look at specific approaches without wasting investment dollars.
